

Dear All,

I am very happy to learn that Professor Minhua Shao of our department received the Supramaniam Srinivasan Young Investigator Award from the Electrochemical Society (ECS) at the 225th ECS meeting in Orlando, Florida last week.

The ECS Energy Technology Division established this award to recognize and reward an outstanding young researcher in the field of energy technology.

Professor Shao is recognized “for his accomplishments in the synthesis and characterization of novel electrocatalysts and materials for electrochemical energy technologies” during his work at UTC Power (on fuel cells) and Ford Motor Company (on lithium-ion batteries) in USA before joining our department in March 2014.

Please join me congratulating Minhua for his outstanding work and the deserved recognition!

Sincerely,

Guohua
